

# PURELAB® flex

Experience the future of water purification in your lab today

Designed to make your life easier, PURELAB flex is the most innovative and flexible addition to ELGA's PURELAB water purification range.

The PURELAB flex delivers consistent high water purity with economical and effortless operation and maintenance. This unique product enables you to concentrate on getting the accurate results you require. Offering unsurpassed flexibility, the compact PURELAB flex is readily adapted to deliver your desired water purity with several dispense options, supporting all of your laboratory applications.

## The PURELAB flex solution for overcoming your water purification challenges

### Your needs

You need absolute confidence in your water purity

You need purified water delivered simply and easily

You need water purity that can adapt to match your specific laboratory applications

You need a cost-effective system

### PURELAB flex solution

Purified water is recirculated through the system to the dispense tip and is constantly monitored at point of dispense. Water quality can be recorded through data capture

The system is ready to use straight out of the box. Purified water is delivered at the push of a button

The system can be configured to meet your purification needs today and in the future

Efficient purification ensures long term operational costs remain low

“Designed to make your life easier”

**1 Dispense button**

- Press to be impressed – unique proportional control that gives you the feel of a pipette controller but with the ease of auto-volume dispensing

**2 Display**

- Unique point-of-use display allows you to see water purity as you dispense
- For reassured confidence the large display shows resistivity or conductivity, and the infobar shows Total Organic Carbon (TOC)

**3 Autovolume dispensing**

- No more overflowing containers and no complicated menus to learn
- Select your required volume then simply press to dispense

**4 Dispense tip**

- Flexible dispense tip filtration guarantees microbial purity
- Our filters can meet <1 CFU/ml or <1 CFU/10 ml, remove RNase, DNase and endotoxins

**5 Dispense handset**

- Ergonomically designed to fit comfortably in the hand, and intuitive to use

**6 Adjustable arm**

- Adjustable height enables just about any laboratory container to be filled easily

**7 Purification pack**

- Highly efficient and easy to replace

**8 USB port**

- Customize the default settings quickly using our website and a USB device
- USB device will automatically upload your customized settings to your PURELAB flex in seconds

**9 UV lamp**

- Multiwavelength UV lamp designed to deliver reliable purified water and monitored to ensure optimum efficiency
